

Hej,

I'm reaching out with pure excitement about joining your team. With over 5 years of customer-focused IT experience, I'm confident my mix of social savvy and tech skills could be a great fit.

In addition to a knack for customer service, I bring a solid programming background. Armed with a bachelor's degree in Hardware Computer and recent completion of the Front-end Development Program at Hyper Island, I've had a blast with projects like "Online Shopping with React" and a thrilling "Shooting Game" using Phaser.

In my latest experience at SlowFashion as an intern, I'm all about developing a Svelte and Tailwind-powered blog, and I played a role in launching the website and blog. It's been a blast, and I'm pumped about bringing this energy to your team.

In past roles like UI/UX Designer at DocLounge, I spiced things up with a website redesign that saw a 35% spike in user satisfaction and page views. I've also danced with Agile as an ITIL Implementation Expert at Parand Tech Group, making processes sing.

I believe my unique combo of programming and knowing Agile make me a perfect fit. I'm not just looking for a job; I'm after a chance to bring my skills, energy, and a bit of fun to your team.

Thanks a bunch for considering my application. I'd love to chat more about how I can add a splash of awesome to your company!

Best,

Golnoosh
